

Work Profile

VINAV P	Email: -
BE	Phone: -

Profile Summary: -

- Expert Java developer with 7+ years of hands-on web development background
- Significant in AngularJS & Angular 7
- Having experience in microservice architecture also Led team of highly skilled engineers.
- Worked in agile framework, collaborating with business and research teams in story grooming, reviewing acceptance criteria and performance metrics
- Developed new libraries with Micro Services architecture using Rest APIs, spring boot
- Worked with project managers, developers, quality assurance and customers to resolve technical issues.
- Worked closely with other business analysts, development teams and infrastructure specialists to deliver high availability solutions for mission-critical applications

Professional Skills

- Core Java, Spring MVC, Hibernate, Spring boot, Spring Cloud, Spring Integration, Apache Camel
- Web Services REST
- MS SQL, MySQL
- Javascript, JQuery, JSP, JQGrid, Jasper Reports, AngularJS
- JBOSS, Apache, SVN
- Microservices

PROJECTS:-

Project 1: RevSeed – Revenue Management Project

Project Description – RevSeed is a revenue management software for hotelier. It tracks, predicts and helps hotel to set rates on Channels for optimum revenue generation.

Roles & Responsibilities-

Lead the team to achieve the timeline and quality of code.

Create timeline, Analyse the requirement, Track development.

Backend as well as front end development & Bug fixing issues, unit testing, requirement understanding

Improve DB performance, write SQL queries, Migration of application into micro service architecture

Create documentation of developed code.

Environments: Java 10, MySQL Server, STS, Spring Boot, Spring JPA, AngularJS, REST and SOAP, Apache Camel, Spring Integration

Project 2: American Public Life - Insurance Project

Project Description - APL is Insurance based project which handles agency portal and process policies. Claim management,

documentation, creating group insurance policies, commission calculation for agents using workflow tool.

Role & Responsibilities -

Convert textual requirement into code.

Development & Bug fixing issues, unit testing, requirement understanding

Consume REST Web services and process the data.

Writing SQL queries using joins and Stored Procedures

Performing integration development with Majesco's product jar

Environments: Java 8, MS SQL Server, Eclipse, Spring, Hibernate, ReactJS, REST and SOAP

Project 3: Agent Onboarding Portal

Project Description - NTUC is insurance-based project, it basically handles back office of agent portal which includes agent on boarding, Hierarchy and training of agent as well as keeps track of customer data and intimate to agent at times.

Role & Responsibilities -

Understanding the domain.

Worked as backend developer and involved into end-to-end module design, development and deployment.

Integration testing & regression testing

Involved in development as well as provide technical guidance and training to junior developer.

Developed Restful API layer using Spring and back-end services using Hibernate.

Environments - Core JAVA, J2EE, SQL Server, Eclipse, Maven, JBOSS, Spring boot, Hibernate, Angular

Project 4: MAHAULB

Project Description - It is a project of Maharashtra government to make all its websites to come under one umbrella so that a common man can solve his every query at one destination.

Role & Responsibilities -

Requirement gathering on the bases of BRD

Write code, database queries and deployment of quality product.

Consume REST web services and integrate different modules of application together.

Unit and Regression testing .

Defect fixing and providing patches if any issues.

Create Jasper Reports in Marathi language

Environments - Core JAVA, Spring, Hibernate, microservices JQGrid, JQuery, Javascript, Jasper Reports, PostGRESql, iReports, Jasper Reports

Project 5: TMC - Disaster Management System

Project Description - This system was made for Thane Municipal Corporation for Disaster Management. It was mainly designed for fire department to ease their office documentation work.

Role & Responsibilities -

Requirement gathering on the bases of BRD

Write code, database queries and deployment of quality product.

Consume REST web services and integrate different modules of application together.

Unit and Regression testing.

Defect fixing and providing patches if any issues.

Create Jasper Reports in Marathi

Environments - Core JAVA, Spring, Hibernate, JQGrid, JQuery, Javascript, Jasper Reports, MySQL, iReports, Jasper Reports

Project 6: TravelPulse - Vehicle Tracking System

Project Description - It was a public facing project for vehicle tracking system. user can track or monitor vehicle movements live from mobile app and website, user can control few functions of vehicle and he can take reports on vehicle maintenance and fuel consumption.

Role & Responsibilities -

Write complex code for vehicle tracking. Consume REST web services for mobile app and portal. Understand the domain and client requirement. Unit and Regression testing. Deployment of application for QA, bug fixing and providing patch.

Environment - Core Java, Spring, Hibernate, Microservices, Jquery, Javascript, JQGrid, JSP, J2EE, Jasper Reports
