

Work Profile

Name: - DBA Arch / DBA

M.S (Computer Engineering, BITS Pilani)

Skillsets / Expertise

Total Work Experience (Yrs)	:	15+
Programming / Languages	:	C, PL-SQL, Core Java, Mainframe Applications Cobol, JCL, CICS, DB2, IDMS, IMS DB/DC, REXX, FILEAID, CHANGMAN, ISPW, InterTest, and XPEDITOR
Web languages Technologies	:	HTML, CSS, ASP, ASP.NET, ASP.NET MVC, Angular 7
Operating System	:	Unix, Linux / Windows
RDBMS	:	SQL
Others	:	Telecom, Banking, Logistics Domains, Solution Design (R & Hadoop Programming, Statistical Estimation)
		Leadership experience in leading large teams and coordinating with Client teams for various requirements within the project.
		Customer Projects include Milton Keynes UK, Syntel Phoenix, Arizona & Memphis, Accenture, India
Technical Certifications	:	C, C++, Linux, Oracle, PL-SQL, Java, HTML, Linux Device Driver Programming, PGD (Analytics), PGD (IOT - BITS Pilani), AWS SA

Work Experience

1. Project: - Real Estate Management System, Accenture

This is web based application for Enterprises for capacity planning for Real Estate Sector.

- 1) Requirements capture for various internal projects within Accenture in capacity planning for real estate requirements.
- 2) Forecasting, Estimations of various changes which come within Space management and facilities management.
- 3) Maintenance, bugs tracking, bug fixing / UAT

This is web based application and technologies used for this application were as follows:

.NET
MS-SQL
Angular JS

2. Project: - FedEx

Price Management Solution for Billing Systems

- 1) Feasibility study for a mainframe-based solution in adopting a new pricing structure within FedEx which standardizes Global pricing strategy within the company.
- 2) Responsible for End to end delivery of the new pricing adoption strategy within FedEx which involved changes to Billing systems.
- 3) The main responsibility is preparing system design, Solution Architecture, estimations, track the project schedules, program issues / Risks / CRs during Analysis, Design, Coding, Testing and deployment and support of various impacted code components.

This is web based application and technologies used for this application were as follows:

COBOL
JCL
IMS
DB2
File Aid
Share point

3. Product: - Amex

AMEX cards product development such as Pay with Points, Miles redemption, Blue bird, etc.

- 1) Program planning, SA, estimation of all components such as COBOL, JCL, DB2, IMS DB / DC
- 2) Preparing Work breakdown structure
- 3) Reviewing, Tracking and monitoring project status and project deliverables of my team.
- 4) Preparing Project Status / financial reports
- 5) Organizational activities which includes interviewing and recruiting new candidates.

COBOL
JCL
IMS
DB2
File Aid
Spufi
QMF

4. Project: - British Telecom (FTTC / General Line Access)

- 1) Design and develop Service and fault Orchestration Flow diagrams and sequence diagrams which involved in customer service faults in copper network.
- 2) Build generic line access which is capable of handling BT's Telephone numbers as well as Copper routes in separate systems

COBOL
CICS
JCL
IDMS
FILEAID
REXX
