MENTION IN REVERSE CHRONOLOGICAL ORDER

February 2017 to Present

From 16 Feb 2017 Project Name Canon Venlo - MOB

To Till Date Client Canon, Netherlands

Role Consultant

Roles performed

- Working on support tickets.
- Interacting with end-users as needed.
- Allocating Change Request and Tickets within Team
- Development with the New requirement

Code base ASP.NET MVC, C#, WCF, LINQ, Visual Basic 6.0, MS Access

Database SQL Server

IDE Visual Studio 2008/2010

Description

MOB is basically meant for Order creation, Contract creation with machine Configuration. This application involves many complex reports with live status of the available items.

This system also deals with the Invoicing part which can be user dependent and automation both. While doing the invoice the data is validated and Process from another application known as BlackBox application. The Black Box application basically created using a WCF services which is integrated as Windows Services which run on interval of every 5 minutes. It validates the Invoices by some Special XML template which is created on based of the invoice types. Once the XML is validated it is passed to the third party Exact Exe which pass the XML file as a Parameter and the Data is loaded into the Globe (Exact) database.

Organization Capgemini India Pvt. Ltd.  
From 16 Feb 2017 Project Name FACIT  
To Till Date Client Canon, Netherlands  
Role Consultant  
Roles performed

- Working on support tickets.
- Interacting with end-users as needed.
- Allocating Change Request and Tickets within Team
- Development with the New requirement and Deployment
