

Seeking challenging environment to leverage my knowledge and expertise, towards the growth of the organization

Experience Summary

Having overall **6 years and 4 months** of industry experience in application development

Currently Working with **Accolite Software India**

3 Years and 7 Months in **Cognizant Technology Solutions**

2 Years and 5 Months in **Tata Consultancy Services**

Professional Profile

- Strong knowledge of REST, Micro Service architecture, distributed application architecture
- Strong knowledge of Data Structures, Algorithms, Time and Space analysis, Design patterns, Object Oriented design
- Expertise in Java 6/7/8, Spring Core, Spring MVC. Spring AOP, Spring Boot, Spring JPA, Spring cloud, ORM technologies like Hibernate.
- Good understanding of JavaScript, Angular 4, Sql, JMS
- Preparing Unit Test Cases using junit, Mockito, Mock MVC.
- Project Management and Build tool like Maven.
- Strong understanding of SDLC processes like Waterfall, Agile.

Programing Languages	Java 6/7/8, JavaScript
Frameworks	Spring, Spring Boot, Spring Cloud, Hibernate, JPA, Angular 4
Tools and IDE	Eclipse, Visual Studio Code, IBM Rational Application Developer, SOAP IU, Postman etc.
Operating System	Windows, Unix
Design Methodology	OOP Design patterns, REST, Micro Service architecture
Version Controlling System	Git, SVN

Academic Qualifications

- Completed B.TECH in Computer Science from West Bengal University of Technology in 2011 with DGPA 8.34/10
- Higher Secondary from WBCHSE (West Bengal Council of Higher Secondary Education) in 2007 with 67.4 percent
- Secondary from WBBSE (West Bengal Board of Secondary Education) in 2005 with 76.4 percent.

Projects

Project 1	Next Generation Ticketing System
Application Owner	British Telecom
Project Span	Aug 2018 – Till Date

Role	Back end & UI Developer, Module lead
Description	The application is being designed targeting to connect entire BT and their vendors and clients through a single portal for raising any service request, problem record, incident request etc.
Technology	Java 8, spring MVC, spring cloud, spring boot, Hibernate, REST architecture, java script, Angular 4, maven
Responsibility	<p>Depending on the business requirement documents I had to design high level and low-level design architecture, and was involved in</p> <p>Sprint planning Requirement Gathering and Requirement clarification, Creating micro services UI implementation Server integration Defect fixing Hosting scrum calls</p>

Project 2	Ecommerce portal for Delta's Cargo shipment of Goods and Live Animal, pharmaceuticals etc.
Application Owner	Delta Air Lines Inc., United States
Project Span	Feb 2016 – Mar 2018
Role	Senior back end developer
Description	deltacargo.com provides a comprehensive platform for purchasing flight tickets to send live animal, goods or human remain. Application has the facility to track the real time status of a consignment, manage an existing booking as well.
Technology	JAVA 7, spring core, spring MVC, MyBatis, SOAP, Oracle DB
Responsibility	<p>Requirement analysis Coding to implement features</p> <p>Peer code review Co-ordination with the onsite team Bug fixing fashion</p>

Project 3	Ecommerce Portal for Delta for Passenger Vacation package and Flight Booking
Application Owner	Delta Air Lines Inc., United States
Project Span	Sep 2014 – Jan 2016
Role	Backend developer
Description	Delta.com provides a comprehensive platform for purchasing flight ticket, cars, hotels and other ancillary products along with vacation packages.

Technology	Java 6, Struts2, SOAP, Hibernate
Responsibility	Requirement analysis Coding to implement features Peer code review Co-ordination with the onsite team Bug fixing

Project 4	Sales Illustration System
Application Owner	MetLife
Project Span	Jan 2012 – Aug 2014
Role	Backend developer
Description	sis provides a comprehensive platform for MetLife agents to illustrate their products to their clients
Technology	Java 6, Spring core, Spring MVC, Hibernate
Responsibility	Requirement analysis Coding to implement features Peer code review Co-ordination with the onsite team Bug fixing
