

Application Programmer			
No. of Positions	-		
Qualification	BE (Army Institute of Technology), Pune		
Work Experience	4+ years		
Skills	<ul style="list-style-type: none">• Backend Language (Core Python, PHP, PHP Laravel Framework)• Frontend Languages (Javascript, Angular 2+, JQuery, HTML, CSS)• Object Oriented Design• Software architecture and design• Databases (Mysql)• Database architecture• Version control tool (GIT)• Deployment using Jenkins on AWS		
	<ul style="list-style-type: none">• Good at Algorithms and problem solving		
CheckPoint Vs Requirement	<ul style="list-style-type: none">• Python programming• Django framework• Angular JS• JavaScript• HTML, CSS, XSLT• Jenkins• MySQL• Database schema modeling• Database development and administration• Amazon Web Services and S3 knowledge	<ul style="list-style-type: none">----------	<ul style="list-style-type: none">YesNoYesYesYesYesYesYesYesYes
Notes	Since Python skillset is available, Django framework will not need > 2 weeks for skill ramp-up.		
Job Handling	Communication		
	Good & Fluent		
	Engagement & Discussion – Good		
	Project Exposure – Good		
	Team work – Good (Co-ordination with internal team members)		
	Technical		
	• UI / UX understanding		
	• Clear understanding of the project & Self starter (startup approach)		

	<ul style="list-style-type: none"> • Following standard processes
	<ul style="list-style-type: none"> • Able to code on his own
	<ul style="list-style-type: none"> • Helps team in problem solving
	<ul style="list-style-type: none"> • Execution of the project as per schedule
	<ul style="list-style-type: none"> • Value addition and suggestions
Projects Worked	Following Projects form part of the role(s) & expertise
<u>Project</u>	RealEstate EasyDay (Future Group)
<u>Project Brief</u>	RealEstate EasyDay is an app where owner or broker can register their land, shops or properties for rent. RealEstate Manager will check out the property location and Evaluate Catchment score and property score and forward the property to Marketing Manager. Marketing Manager will evaluate IRR (Internal rate of return) and forward property to Mgmt level for approvals. Mgmt will approve property if all details are ok and open easyday stores there.
<u>Work Details</u>	<ul style="list-style-type: none"> • Created APIs in Laravel PHP Framework • Followed SOLID OOPs Principles • Authorization and Authentication • Software Architecture • Created web based application in Angular 6 • TDD (Test Driven Development in both Laravel and Angular) • Used Redis for Caching • Database Architecture • Handled multiple roles • Used MongoDB for Audit logs
<u>Project</u>	Fortis agent portal (NDTV)
<u>Project Brief</u>	<p>Fortis agent portal is a web app which helps fortis agents (customer care, front end desk, hospital level admin, super admin) to manage: -</p> <ul style="list-style-type: none"> • Doctors schedules like set availability of doctor and create timeslots • Appointments (create appointment for a doctor, reschedule and cancel) • Patients profile • Doctor leaves • Block / Unblock doctor time slots • Resolve conflicts with doctor leave and appointments if on same date • Doctors specialty • Hospitals • Manage user roles (for super admin)

	<ul style="list-style-type: none"> • Export appointment report • Booking request for star doctors
Work Details	<ul style="list-style-type: none"> • Created doctor schedules by putting end date, start date, day, start time, end time, fees and break time and then used jobs to break slots and create timeslots • Create appointment by fetching the timeslots of a doctor and then selecting slot and send payment url • Rescheduling appointment and manage refund if reschedule against slot with different fees • Cancel appointment and make refund as per refund policies. Dispute section if there is any problem with appointment and hospital (cancel and reschedule appointment) • Create doctor leaves and put the appointment on that particular day to conflict section • Block doctor slot and put if appointment exists in conflict section • Export appointment report based on search fields like start date and end date • Written scheduler to create doctor schedules, salesforce • Used repository pattern in laravel and SOLID oops concepts • Audit using Model Observer • Salesforce integration for different requests (booking request, health offer request) • Manage user roles and permission
Project	RentedRoofs
Project Brief	<p>Portal for Housing Complex Management Requirements. There shall be a dedicated property manager working for you round the clock. Will always be available for you in-person. All tasks related to your rental property will be done as per your specifications only.</p> <p>We provide you your rental property details on your fingertips, an online dashboard for all there is to know about your property.
