Platform - Windows2000, Windows XP

Project Description This is a media portal project, had to part one is web second one is desktop application. My role was to develop Media player & a media up loader to web server. User can download or upload their favorite's music. With the help of this player user can listen their Downloaded music from TurnItUp server.

Project #5:

Title - ACS Group CRM software

Position - Programmer, Analysis

Responsibilities - Development & Project Report

Languages & tools - VB.Net, Win32API

Back-End - SQL Server2000

Platform - Windows XP

Project Description The project is primarily designed for ACS advisory services limited. This is a windows based and partially web based software. They deal with KOTAK & BABAJ ALLIANZE life insurance. This software is used for various kinds of transactions and maintains their records. In this application special services that is needed for their transaction is made such as letter mail merge, letter envelop, scan reports, telephone verification call. My responsibility was to develop those special services.

Project #6:

Title - PharmaSoft

Position - Programmer

Responsibilities - Development & Project Report

Languages & tools - VB.net, Win32API

Back-End - SQL Server2000

Platform - Windows2000 Professional

Project Description 'PharmaSoft' is basically Pharmaceuticals project. This desktop application is made for tracking all kind of different transactions and maintains their records. As per my responsibility I worked on licensed management system. I developed registration section.

Project #7:

Title - ChartGuru (EOD)

Position - Programmer, Designer, Analysis

Responsibilities - Development & Project Report

Languages & tools - VB6.0, Win32API, ASP3.0

Back-End - Oracle 9i

Platform - Windows XP

**Project Description** With the help of this desktop application user track the stock market share values. We upload all information binary file about share at the end of day (EOD) into our server. whenever application initialized in online it will update itself, so user can use it in offline mode. All these can be done by a purchased licensed user. We also develop an application for our in-house uses. Collected information from stock exchange is not compatible with our application so using this in-house application it will collect information from stock market; convert into ChartGuru compatible binary format, last step upload to our web server.
