Work Profile

Name: - Rakesh Gohil
BE CS

Skillsets / Expertise

Total Work Experience (Yrs)	:	9.5+
Programming Languages	:	VB.NET / Vb 6.0 / C# / ASP.NET / Ado.Net
Web languages Technologies	:	Html, Ajax, Xml, JQuery, Ajax, Java Script
Operating System	:	-
RDBMS	:	SQL Server 2008/2012/2014
Others	:	.Net Framework, TFS, VSS, Visual Studio .NET (2008, 2010, 2013, 2015), Database Developer, WPF, MVVM, MVC, WCF, Web Service, Web API, SQL, XML, HTML, Crystal Report, SSIS, SSRS, OOPS, SOLID Principles, Design Patterns, Multithreading, LINQ, Entity Framework, LLD, UML Diagrams creation, SDLC
Others	:	-

Work Experience

1. **Project: -   Casting Networks**

   Casting Networks provides end-to-end technology and dedicated support for casting in the LA, NY, SF, AU and UK. We connect actors and representatives with thousands of casting directors worldwide.

   Responsibilities:
   1. Creating WBS and doing requirement analysis and identifying discrepancies which might arrive in later part of SDLC.
   2. Doing code for using industry best practice.
   3. Demonstration of Code and functionality with end users and business analyst during review process.
   4. Furnishing technical solution, handling code review, remediation &optimization and performance tuning activities.

   C#
   ASP.Net
   MVC
   Classic ASP
   Web Services
   Web API
   VB.Net

Business Add: - Level 13, REGUS, Platinum Techno Park, Sec-30A, Oppo. Vash Rly. Stn., VASHI, Navi Mumbai – 410 210, M.H, India. Ph: - +91 22 2774 3774.

3. Project: - Sage Accpac ERP

TheSage Accpac ERP is small ERP of midsize business. It includes different modules like Accounts Payable, Accounts Receivable, General Ledger, Project and Job Costing, Return Material Authorization, Inventory Control, Purchase Orders, (Sales) Order Entry.

Responsibilities:
- Conducting requirement gathering and review with users.
- Created the technical design documents based on requirement and code implementation
- Analysis done for project high level estimates, creation of code and task creation for individual module.
- Authored unit/ N-unit test case and executed it after code completion
- Prepared the required packages, stored procedure &functions using SQL 2005
- Acceptance testing done for individual module.
- Solved the tickets for production support and developed documents to implement change request

VB 6.0 (COM / DCOM / ADO)
SQL
Crystal Report 11

4. Project: - Store Man, HR Pro and CM Pro

The HR Pro application involves modules like tracking employee histories, skills, abilities, salary and their accomplishments. I have worked on the employee module comprising of leave management, salary processing. Collateral management involves handling and movement of commodities where in the customer deposits their commodity in predefined Warehouse. This application involves different modules like Commodity Deposit Form (CDF), Details of Commodity Acceptance Report (CAR) and Commodity WithdrawalForm (CWF) which was successfully implemented.

Responsibilities
- Conducting requirement gathering and review with users.
- Created the technical design documents based on requirement and code implementation
- Based on user requirement creating screen mock-up and proposed user interface
- Analysis done for project high level estimates, creation of code and task creation for individual module.
- Authored unit/ N-unit test case and executed it after code completion
- Prepared the required packages, stored procedure & functions using SQL 2005
- Created reports in excel.
- Acceptance testing done for individual module.
- Solved the tickets for production support and developed documents to implement change request

5. Project: - LMS-Locker Management System.

Business Add: - Level 13, REGUS, Platinum Techno Park, Sec-30A, Oppo. Vash Rly. Stn., VASHI, Navi Mumbai – 410 210, M.H, India. Ph: - +91 22 2774 3774.

Page **3** of **4**

Locker Management Systems is highly authorized system where-in the user (Bank employee) can authorize the customer through finger scanning pattern, card reader or both.

Responsibilities

- Handled coding functions as per client guidelines and design artifacts.
- Developed Unit/ NUnit test case and executed it after code completion.
- Facilitated code refactoring based on code review comment.
- Utilized flex grid for complex edit, update and delete functionalities.
- Carried out defect analysis, proposed best solution and fixed it using ClearQuest.

VB 6.0
SQL 2008
VSS
Crystal Report 8.5
VB.Net
VBA, Excel

6. **Project: -** MOMS –Material of Management System

The project includes whole lifecycle of material in Construction Company, same as ERP, I have started my career from this company and I used VB Data report in this project.

Responsibilities:

- Developed the unit test case and executed it after code completion
- Handled coding as per instructor guidelines and design documents
- Prepared reusable user and custom control
- Involved in handling SQL query/ store procedure optimization, triggers, function and other database activities
- Engaged in fixing & tracking defects and handling project configuration using Visual Source Safe

VB 6.0
SQL 2000
VB Data Report
DB Access
VSS

Business Add: - Level 13, REGUS, Platinum Techno Park, Sec-30A, Oppo. Vash Rly. Stn., VASHI, Navi Mumbai – 410 210, M.H, India. Ph: - +91 22 2774 3774.
