SUMMARY

- 9 years of total IT experience in Integration technologies like Dell-Boomi Atomsphere cloud Integration and Microsoft BizTalk server.
- Having exposure in working at customer place (**onsite**) as an integration consultant, **JORDAN**.
- Having 5+ years of experience in **Dell Boomi Cloud Integration**.
- Certified in **Dell Boomi Development & Administration**.
- Certified in **Dell Boomi Flow as a Developer**.
- Certified in **Dell Boomi API Management**
- Implemented **AWS Lex Bot to Deploy** the Boomi Process.
- Expertise in exposing Boomi Process as webservices using Boomi API Management.
- Expertise in multiple full life cycle integration implementations in Dell Boomi Atmosphere with different connector types like SAP, Salesforce, Database,Workday,NetSuite,SFTP, Web Services, HTTP Client, SOAP Client, MongoDB, PostgreSQL.
- Good understanding knowledge on XML, JSON and Flat Files.
- Effectively managed and handled full and delta load calculation at boomi before sending data to target system.
- Expertise in different types of profiles like Flat File, XML, Json and Database while integrating with multiple systems.
- Good knowledge and understanding of different Message queues like Atom Queue, RabbitMQ, IBMMQ.
- Having experience in all phases (Design, Development, Test, Deploy, Support) of Boomi Process Development.
- Having good experience with many available shapes in boomi.
- Experienced in Microsoft BizTalk Server 2016 Azure Cloud with logicapps/2013/2010/2006 R2, Microsoft ESB 2.2, and Microsoft BizUnit, BTDF, BAM, Microsoft SQL Server 2016/2012/2008 and C #.NET.
- Having experience in Scrum-Agile methodology mode of development.
- Capable individual as well as a good team player with innovative support having sound analytical, technical and trouble shooting skills.

TECHNICAL SKILLS

Integration Tools	Dell Boomi Atomsphere, API Management and Biztalk Server.
Databases	PostGreSQL,SQL,Oracle,MySQL
Other Systems	SFDC,SAP,OpenLDAP,RabbitMQ,IBM MQ,WebServices Server,SFTP, DISK, FTP,Netsuite, HTTP Client, Workday
Cloud Technology	Dell Boomi, Azure
Domain	Digital, Retail, Oil and Gas, Insurance

PROJECTS

Project Name: USA

Nature of Project	Creation of new integration solutions using Boomi.
Connectors Used	NetSuite, HTTP Client, Atom Queue, Amazon SQS
Role	Principal Consultant

Project Description:
- manages all of their new product design processes within BeProduct which is a SaaScloud based PLM (product lifecycle management) solution/platform for apparel designers tocollaborate together in order to create new clothing Styles/Designs.
- After successfully collaborating on a new design, a business approval process (including CEOreview/approval) is initiated; upon final approval the Style Lifecycle Status will be set to =Adopted. It is at this time the scheduled integration process needs to create SKUs in NetSuite.
- Prior to the Style being approved in BeProduct, key attributes are set on the Style record inBeProduct which inform the unique SKUs (NetSuite items) which need to be created.
- The unique combination of Size, Color, & Fabric for a given Style = a new unique SKU/item whichneeds to be created in NetSuite. Upon successful item create in NS, the integration will post backto BeProduct the NetSuite internal ID for each SKU/item along with updating the Last Sync toNetSuite field in BeProduct so that information is available/viewed by business users & systems
- Correlating different continuous business strategy method such as
  - SO/PO/TO
  - Item Fulfillment/cash Refund/ItemReceipt/Return Authorization

Roles & Responsibilities:
- Understanding the FDD and estimating the time efforts for new Processes,CR's and Problem Fixes.
- Developed multiple system integrations and deployed with various environments using the configuration extension method.
- Providing architectural design solutions and decisions for the environment setup and process development.
- Effectively working with different systems in order to understand the overall functionality of the business process for effective solutioning.
- Expert in Confluence management and JIRA management.

Project Name: USA	

Nature of Project	Creation of new middleware solutions using Boomi.
Connectors Used	Salesforce, Database(PostgreSQL), Disk, Mail, SFTP,FTP, Workday and NetSuite etc.
Role	Principal Consultant

Project Description:
a leading supplier of productivity-enhancing instrumentation and controls.
Headquartered in Egham, Surrey, United Kingdom.

Roles & Responsibilities:
- Creating the TDD for new interface design by understanding the FDD and estimating the time efforts for new Processes,CR's and Problem Fixes.
- Developed multiple system integrations and deployed with various environments using the configuration extension method.
- Providing architectural design solutions and decisions for the environment setup and process development.
- Effectively working with different systems in order to understand the overall functionality of the business process for effective solutioning.
- Expert in Confluence management and Visio(Architectural design patterns)

Project Name	Retail-Boomi Cloud

Connectors used	: SFDC,Database, Disk, Mail, SFTP etc.
Technologies/Tools	: Boomi Atomsphere.
Role	: Inegration Lead
Team Size	: 6

Project Description:

A Norwegian cooperative. It is owned by 117 local cooperatives with more than 1.3 million members.[1] The company has its headquarters in Oslo.
Cloud migration is the project which holds the responsibility to convert all biztalk interfaces to boomi premise as well as cloud.

Roles & Responsibilities:
- Creating the TDD for new interface design by understanding the FDD and estimating the time efforts for new CR's and Problem Fixes.
- Estimating new requirements and provide analysis document.
- Responsible for design, configuration, testing, documentation, UAT and production support of all aspects.
- Involved to write complex Business Rules and uses Flow control.
- Involved in different phases like build, deploy and manage.
- Mentored the team members to understand the project Architecture.
- Responsible for development of entire use case (end to end).

Project Name: Philips

Connectors Used	Dell Boomi AtomSphere,SFDC,SAP,SFTP
Applications	Philips Business Applications
Role	Integration Senior Dev

Project Description:

Service Max is the cross sector MP1 approved work order management solution that is integrated with the SAP MP1 platform and Salesforce. There is a need to interface both platforms using IBM WebSphere ESB middleware/Dell Boomi. Adopting the MP1 solution will ensure a focus on out of the box functionality with customization only where there is a need to differentiate, thus reducing costs and sharing of best practices across business sectors.

Roles & Responsibilities:
- Developed Dell Boomi Process, API, Process Route Component and involved in developing Script
- Worked on Shapes like Data Process, Message, Notify, Exception, Set Properties, Decision, Map, Cleanse, Business Rules, Process Call, Process Route, Flow Control
- Worked on Connectors like Salesforce, Salesforce Apex, Web service Soap Client, SAP, HTTP Client, Disk, FTP, Email, Atom Queue, Http Patch Client, Database etc.
- Worked on Dynamic Process Property, Dynamic Document Properties, Process Property, Document Property, Cross Reference Lookup
- Worked on deployment of Dell Boomi Process and API and its Configuration
- Worked on XML, JSON, Flat File, DataBase Profiles.
- Involving in unit testing and integration testing.
- Involving in different phases like build, deploy and manage.

Project Name: CARREFOUR, UK

Nature of Project	Designing, Development, Unit testing and Supporting for Integration Layer
Skills Used	Dell Boomi, BizTalk server 2010
Applications	CARREFOUR Business Applications
Role	Senior Software Engineer

Project Description:

Carrefour is a French multinational retailer headquartered in Boulogne Billancourt, France, in Greater Paris. It is one of the largest hypermarket chains in the world

Microsoft
C E R T I F I E D
Technology Specialist

Microsoft Biztalk Server
2010

DELL Boomi

(with 1,452 hypermarkets at the end of 2011), the fourth largest retail group in the world in terms of revenue (after Wal-Mart, Tesco and Costco), and the third in profit (after Wal-Mart and Tesco).

Roles & Responsibilities:
- Getting the data from third party databases and performing the tasks as per the client requirement.
- Created integration flows which include the components -Mappings, Process and various other components.
- Created new environment like Test/Production and installing & configuring Atoms.
- Deployed the build process in different environments like Test/Production mode.
- Co-ordination with onsite team to gather the accurate requirements.
- Involving in unit testing and integration testing
- Involved in monitoring production environment using VisualVM, BizTalk360.

Project Name: USA

Nature of Project	Development, unit testing and Supporting for Integration Layer
Skills Used	Dell Boomi Atomsphere,SAP,SFDC
Applications	Actavis Integration applications
Role	Boomi Developer

Project Description:
One of the world's leading players in the development, manufacture, and sale of first-class generic pharmaceuticals. The successful integration of a number of acquisitions has helped position the corp among the world's largest companies in the industry. Founded in 1956, the Group has more than 10,000 employees operating in over 40 countries around the globe. The integration uses BizTalk Server 2010 as their middleware platform for integration of SAP modules and various applications.
Corp wishes to change their existing systems JDEdwards to SAP to meet growing business demands and also adopt the latest technology products and practices.

Roles & Responsibilities:
- Migration of mediation services to Dell boomi which connect Source system to Database which also sends an email with the attachments using Email connector.
- Knowledge/POC experience on other Dell Boomi Connectors called AtomSphere API, HTTP Patch connector
- Worked on Connectors like Web service Server, Web service Soap Client, HTTP Client, Disk, Database etc.

- Developed mediation services and BPEL to connect to third party using web service binding.
- Worked on deployment of Dell Boomi Process and API and its Configuration

Project Name: UK

Nature of Project	Development, deployment, unit testing and Supporting for integration applications.
Skills Used	BizTalk 2013, Microsoft Visual studio 2012,SQL server 2008, ESB Toolkit 2.2
Applications	Click and Collect and IP module.
Role	Software Developer

Project Description:

UKs leading supplier of foreign Currency to businesses in Financial Services, travel, tourism and retail sector. It offers a range of services including wholesale notes provision, branch supply, Travel Money Online, management of prepaid Travel Money Cards, branch training and marketing. SAR program was initiated to increase the customer base, scalability to market, better customer services, etc..

Roles & Responsibilities:
- Involved in HLD and LLD preparation.
- Involved in installation & Configuration of BizTalk Server, ESB Toolkit.
- Developing Business Services and Atomic Services for various Modules (OMS, IP).
- Involved in preparation Mapping Sheet between various Tracks.
- Creation of Itineraries, Schemas, BRE's and Transformations.
- Implementation of Pipeline and Custom Pipeline Components.
- Integrating Axapta services by consuming WCF Services in BizTalk Server.
- Publishing WCF services as Business Service for MoneyCorp to consume.
- Involved in Unit Testing.
