Seeking a position that would provide me to contribute and develop my knowledge and skills in the information technology industry that offers professional growth while working for the welfare of the company, through constant learning and perseverance.

CORE COMPETENCIES

- ✓ Analytical skills
- ✓ Good knowledge on Core JAVA
- ✓ Good knowledge on Core Advanced JAVA (JSF, SPRING, SERVLET)
- ✓ Good knowledge on UI & JAVA Script & JQUERY
- ✓ Good knowledge on Hibernate
- ✓ Good knowledge on Core JAX – RS, JAX – WS, Maps integration with Leaflet

SUMMARY OF PROFESSIONAL EXPERIENCE

- ✓ Currently working as **Software Engineer** with **Manhattan Associates**
- ✓ Offering **5 years of experience**
- ✓ Experience in training and guiding the new team members

CAREER GRAPH

Currently working in Manhattan Associates (May 2016 till date)

Manhattan's Transportation solutions offer end-to-end business process support for all transportation functions––across all modes and the entire logistics network—for private fleet as well as common carrier management. From strategic analysis, procurement, and operational planning to execution, visibility, and freight payment and claims, TLM helps reduce transportation costs, improve service levels, automate processes, streamline execution, and lower operational risk.

ð Technology Used:

- ✓ XHTML, JSP, EXT – JS, JSF, SPRING, MAUI
- ✓ BING – HERE – ALK Maps integration with Leaflet plugin
- ✓ JDBC, REST API, Hibernate ORM, SOAP, XML, JSON, REST services, JAX – WS
- ✓ Database: Oracle 9i

ð Key Responsibilities:

- ✓ Out of multiple modules in TLM - PO (Purchase Order) & RTS (Ready to Ship) modules are critical module interacts with other products and also part of other products. Responsible for enhancement & maintenance
- ✓ Maintenance - filing up of functionality gap, solving dead lock issues, performance issues, connection leak, UI defects
- ✓ Also part of maintenance of other modules in TLM - DO (Distribution Order), Shipment, Booking, Maps, Vendor visibility, Merge activity
- ✓ Creation of SOAP clients for PC MILLER web services
- ✓ Writing GROOVY test cases
- ✓ Enhancements related to accessorial & accessorial cost
- ✓ Training and hand hold support to fresher

δ   Noteworthy Achievements:

✓ Within a short span of time (say for 6 months) key responsibility for PO & RTS modules was shifted to me to handle all the critical and regular cases. As these modules are being critical in the whole supply chain product
✓ I have handled other key module issues as well seamlessly without any escalations
✓ Top priority issues were addressed with very less support from seniors and have received the appreciation
✓ Have been acknowledged with good ratings year on year

SLK Software (Jan 2014 – Apr 2016)

A. Project 1 (Currently working on from Nov 2014 onwards):

Client is a leading giant in Banking Industry. Developing a tool to take action on identifying defaulted/expected to be defaulting loans, to take a suitable action on the same. Project operates on Agile Methodology.

δ   Technology Used:

✓ Front End: IBM BPM and Internal Database provided by IBM BPM
