Project Details:

- **Quiz Management System:** Quiz Management System with user registration, user-quiz mapping, quiz expiration, deciding result/winner based on: total no. Of right answers, time required to complete quiz (only considered when there's tie). This software is built using Java Swing, Node.js, and MySQL.

- **Timetable Generator Using Java:** Java Desktop application for faculties to generate timetable for a semester which accepts inputs as number of subjects, total number of lecture/practical to be conducted of respective to subject, plotting these lecture/practical automatically using custom algorithm. This software is built using Java Swing, JDBC, iText API for creating PDF, Java Mail API (To mail these pdf's), and MySQL.

- **IMEI Tracker:** This is an android application. If a smartphone is stolen and the SIM card is changed, the mobile number of new SIM card will be sent to the recovery mobile numbers specified by the user at the time of registration. Also, if the thief changes the IMEI number of smartphones, the new IMEI number will be send to the recovery contacts.
