📍 Mumbai, India

SUMMARY

I have been working in Android App Development since 2018, during this period I have worked in different companies & environments. I am a self-motivated & self-taught professional who likes to solve problem.

Analytical & detail oriented Mobile App Developer professional with stellar communication skills. Adept at bringing all team members together to reach a common goal on time and under budget. Conceptualizing app solutions with the latest technology, design theory, and a large dose of creativity. Committed to viable and easily functional app solutions for clients.

EXPERIENCE

Android Developer

Uplyft Innovations Pvt. Ltd.

📅 05/2019 - Ongoing 📍 Mumbai

Uplyft Innovations is a Mumbai based start-up. It is a product based company which has been involved in health & fitness domain. My job here is to work on research, development and to maintain the Gym App. My further responsibilities includes following:

- Handling various technical aspect like coding of modules using the given specifications, debugging & fixing the defects as well as analyzing the root cause.
- Ensure that business requirements & functional specifications for the module coded by me are tested & fulfilled before the code is delivered for integration.
- Coordinating with team members for system design, integration, application maintenance etc.
- Understanding & Mapping client's requirements / enhancements to the product, implementing solutions that effectively resolve problems or provide improvement.
- Programmed with clean, modular, robust code using Java and XML with Android SDK platform supporting different UI resolutions.
- Fixed bugs with code, design patterns and miscellaneous occurrences during projects.
- Successfully deployed the app on the Android Marketplace and supported the app for different releases of Android OS.
- Integrated Fitness API, Firebase Products like FCM, Crash Reporting, Authentication & other open source APIs within applications.
- Used open source libraries like Glide & Retrofit to fetch data from the Web-Services.
- Used Git as Version control system, Flavour, Firebase App Tester & Fabric Crashlytics for Android.
