RDBMS   : MS-SQL Server 2014 / 2012

Version Control Tools   : SVN, TFS

	Project Details:
Project Name:	**I-Learn**
Team Size:	**5**
Technology Used:	ASP.NET 4.5, C#, SQL Server 2012, Ajax, jQuery, CSS, MVC, Web API, OOPS
Description:	✓ It's an educational portal which contains videos of different formats, information upon different types of stock market topics. ✓ Member can enroll for training programs, e-learning programs etc. ✓ Once member successfully completed any training programs or online programs then he can also attend online test in order to get valid certification from organization. ✓ It also contains various reports like classroom report, MIS, online registration report etc. ✓ This portal helps you manage interactions, analytics and learning performance for ICICI Securities in India.
Responsibilities:	• Involved in Requirement gathering, design and documentation. • Developed and tested web forms in ASP.NET with C#. • Also converting application into asp.net MVC. • Involved creation of stored procedure and functions in SQL Server 2012. • Used JavaScript and jQuery for client-side validation.
Project Name:	**ESOS (Employee Stock Ownership Scheme)**
Team Size:	**5**
Technology Used:	ASP.NET 4.5, C#, SQL Server 2014, Ajax, jQuery, MVC, Web API, Payment Gateway Integration, OOPS
Description:	✓ ESOS is an employee benefit plan which provides company's workforce with an ownership interest in the company. ✓ ESOPs are usually given to remunerate and retain the employees. ✓ Employee Stock options are given to the employees at a price which is usually lower than the market value. ✓ This pre-defined price is called Strike price or exercise price. ✓ In order to benefit from this plan, the employee has an option to exercise his ESOPs by buying these shares at the pre-defined price.
Responsibilities:	• Involved in Requirement gathering, design and documentation. • Developed and tested web forms in ASP.NET with C#, AJAX, HTML, CSS. • Also converting application into asp.net MVC. • Involved creation of stored procedure and functions in SQL Server 2012. • Integrated payment gateway in application.

Project Name:	**Complaint Relationship System**
Team Size:	5
Technology Used:	ASP.NET 4.5, C#, SQL Server 2012, Ajax, jQuery, CSS, MVC, WCF, OOPS
Description:	✓ Members can directly escalate all type of complaints to any department of the Exchange. ✓ Get SMS and email alerts with complaint number, as soon as your complaint is registered in CRS. ✓ Members can track real time status of all their escalated complaints. This ensures transparency in complaint follow-up. ✓ Real time status comprises action being taken by BSE dept. with respect to resolving member complaints. ✓ When any BSE dept. closes any complaint, SMS and email alert to this affect is sent to member. ✓ If member is unsatisfied with complaint resolution, member has complete rights to REOPEN any complaint. ✓ Multiple reports generation also done through CRS like dashboard report, user report, department wise report etc.
Responsibilities:	• Involved in Requirement gathering, design and documentation. • Developed and tested web forms in ASP.NET with C#, MVC, AJAX, HTML, CSS. • Involved creation of stored procedure and functions in SQL Server 2012. • Used JavaScript and jQuery for client-side validation.
Project Name:	**BSE BOND**
Team Size:	**5**
Technology Used:	ASP.NET 4.5, C#, SQL Server 2012, Ajax, jQuery, CSS, OOPS
Description:	✓ BSE BOND is a platform for issuance of debt securities on private placement basis helping issuer to raise debt. ✓ It is a user-friendly system aimed to help the market participants for better price discovery and transparency in the overall process of fund raising. ✓ Participants like Issuers, arrangers, sub-arrangers and Qualified Institutional Investors can participate directly on the platform. ✓ It contains multiple report generation for all participants.
Responsibilities:	• Involved in Requirement gathering and design documentation. • Developed web forms in ASP.NET with C# and VB.NET, SQL server 2012 as a back end. • Involved creation of stored procedure and functions in SQL Server 2012. • Used JavaScript and jQuery for client-side validation.

Project Name:	**Online Trade Download (OTD)**
Team Size:	4
Technology Used:	Console Application, Windows Application, Socket Programming, C#, SQL Server 2012
Description:	✓ It's a client-server application which is mainly used to download trades at client's machine in different formats. ✓ OTD is a windows application running on client machine sends request to server which is running at exchange end. ✓ Server accepts request from OTD application and authenticate user depending upon user credentials. ✓ Once user authenticate then server starts to send trades done by client in exchange and OTD application starts downloading trade in excel at client's end.
Responsibilities:	• Responsible for full lifecycle application development. • Responsible for designing, coding, testing and database management by using VB.Net, socket programing. • Design and develop programming systems making specific determinations about system performance. • Create various stored procedure and functions for application.
Project Name:	**Single Sign On (SSO)**
Team Size:	5
Technology Used:	ASP.NET 4.5, C#, SQL Server 2012, Ajax, jQuery, CSS, OOPS
Description:	✓ Using single sign on application user can access more than one application with only one user id. ✓ Members can give their feedbacks and suggestions to any dept in the Exchange through SSO-CRS. ✓ Helpdesk tracks all pending complaint in SSO CRS and escalates it regularly to top Management in the Exchange, till the complaint is closed. ✓ Member can access other modules in SSO like BEFS, Extranet, Location Id Registration, UCC, iBBS etc. using one password.
Responsibilities:	• Involved in Requirement gathering and design documentation. • Developed web forms in ASP.NET with C#, SQL server 2012 as a back end. • Involved creation of stored procedure and functions in SQL Server 2012. • Used JavaScript and jQuery for client-side validation.
